Preparation of the Directory

Preparation of this DIRECTORY has spanned 2 years. Therefore, many individuals who recently finished their formal education and entered the fields of forest pathology and entomology may not be included here. Also, many individuals may have changed positions and addresses. Finally, even though we tried to contact individuals in every country, several countries provided few or no individual responses, and coordinators for some countries could not be identified.

Special thanks is expressed to Phyllis Moline for compiling the database, and to Mary Peterson and Kevin Nimerfro for publication format; all located at the North Central Forest Experiment Station, St. Paul, Minnesota, and to the University of Minnesota, Department of Entomology for their assistance.
