Bulletin of Hardwood Market Statistics: Summer 1993

Jean W. Nolley

Abstract

Provides current and historical information on primary and secondary hardwood product production, prices, international trade, and employment.

Introduction

This is the 22nd in a series of statistical bulletins to be released by the USDA Forest Service, Northeastern Forest Experiment Station. These statistics are for use by hardwood related industries, forest managers, the academic community, and the general public. Current, as well as historical, data are presented for comparison.

Lumber, veneer, and plywood export figures for the third quarter of 1989 and thereafter are based on computer programs updated by the U.S. Department of Commerce, Bureau of the Census, in cooperation with

the USDA Forest Service, Princeton, West Virginia, and reflect actual amounts exported. The remaining volume figures for exports continue to be suppressed due to errors in data. Export figures between 1980 and 1988 are unreliable due to errors during the development of these statistics. For further information contact Cynthia D. West, Princeton, West Virginia, at 304-425-8107.

The statistics presented in this bulletin are not inclusive. Specific series were selected based on their completeness and representativeness.

We need your opinion to make this series more useful. We need your input on additional data series we can publish and more useful breakdowns of the data that are currently published. Copies of this bulletin are free, upon request. Send your comments and requests for copies to Jean W. Nolley at the address below.

JEAN W. NOLLEY is a member of the hardwood demand analysis unit at the Northeastern Forest Experiment Station, Forestry Sciences Laboratory, Rt. 2, Box 562-B, Princeton, WV 24740.
