Bulletin of Hardwood Market Statistics: Winter 1991

Jean W. Nolley

Abstract

Provides current and historical information on primary and secondary hardwood product production, prices, international trade, and employment.

Introduction

This is the 15th in a series of statistical bulletins to be released by the USDA Forest Service, Northeastern Forest Experiment Station. These statistics are for use by hardwood related industries, forest managers, the academic community, and the general public. Current, as well as historical, data are presented for comparison.

Lumber, veneer, and plywood export figures for the third quarter of 1989 and thereafter are based on computer programs updated by the U.S. Department of Commerce, Bureau of the Census, in cooperation with the USDA Forest Service, Princeton, West Virginia, and

reflect actual amounts exported. The remaining volume figures for exports continue to be suppressed due to errors in data. Export figures between 1980 and 1988 are unreliable due to errors during the development of these statistics. For further information contact William G. Luppold, Princeton, West Virginia, at 304-425-8107.

The statistics presented in this bulletin are not inclusive. Specific series were selected based on their completeness and representativeness. For instance, Ohio log and stumpage prices have been included because prices for all major species and log grades have been reported on a biannual basis for over two decades.

We need your opinion to make this series more useful. We need your input on additional data series we can publish and more useful breakdowns of the data that are currently published. Copies of this bulletin are free, upon request. Send your comments and requests for copies to Jean W. Nolley at the address below.

JEAN W. NOLLEY is a member of the hardwood demand analysis unit at the Northeastern Forest Experiment Station, Forestry Sciences Laboratory, Rt. 2, Box 562-B, Princeton, WV 24740.
