Bulletin of Hardwood Market Statistics: Spring 1991

Forest Service

Experiment Station

Research Note NE-346

Jean W. Nolley

Abstract

This publication provides current and historical information on primary and secondary hardwood product production, prices, international trade, and employment.

Introduction

This is the twelfth in a series of statistical bulletins to be released by the USDA Forest Service, Northeastern Forest Experiment Station. These statistics are for use by hardwood related industries, forest managers, the academic community, and the general public. Current, as well as historical, data are presented for comparison.

A new table, 12A, has been added. This table contains volume figures for log exports in cubic meters. It was necessary to develop this table because there is no unique conversion factor for logs to change cubic meters to board feet. Table 12, which contains export figures from 1978 through 1988, will be retained as a separate table for historical purposes. Total log exports and exports to Western Europe continue to be suppressed due to errors in data.

Lumber, veneer, and plywood export figures for the third quarter of 1989 and thereafter are based on computer programs updated by the U.S. Department of Commerce, Bureau of the Census, in cooperation with the USDA Forest Service, Princeton, West Virginia, and reflect actual amounts exported. The remaining volume figures for exports continue to be suppressed due to errors in data. Export figures between 1980 and 1988 are unreliable due to errors during the development of these statistics. For further information contact William G. Luppold, Princeton, West Virginia, at 304-425-8107.

The statistics presented in this bulletin are not inclusive. Specific series were selected based on their completeness and representativeness. For instance, Ohio log and stumpage prices have been included because prices for all major species and log grades have been reported on a biannual basis for over two decades.

We need your opinion to make this series more useful. We need your input on additional data series we can publish and more useful breakdowns of the data that are currently published. Copies of this bulletin are free, upon request. Send your comments and requests for copies to Jean W. Nolley at the address below.
