Production, Prices, Employment, and Trade in Northwest Forest Industries, First Quarter 1994

Debra D. Warren

ABSTRACT

Warren, Debra D. 1994. Production, prices, employment, and trade in Northwest forest industries, first quarter 1994. Resour. Bull. PNW-RB-204. Portland, OR: U.S. Department of Agriculture, Forest Service, Pacific Northwest Research Station. 130 p.

Provides current information on lumber and plywood production and prices; employment in the forest industries; international trade in logs, lumber, and plywood; volume and average prices of stumpage sold by public agencies; and other related items.

Keywords: Forestry business economics, lumber prices, plywood prices, timber volume, stumpage prices, employment (forest products industries), marketing (forest products), imports and exports (forest products).

PREFACE

This report presents current information on the timber situation in Alaska, Washington, Oregon, California, Montana, Idaho, and British Columbia, including data on lumber and plywood production and prices; timber harvest; employment in forest products industries; international trade in logs, pulpwood, chips, lumber, and plywood; log prices in the Pacific Northwest; volume and average prices of stumpage sold by public agencies; and other related items.

Cooperation in supplying data has been received from the following sources: U.S. Department of Agriculture, Forest Service, Forest Inventory and Economics Research Staff in Washington, DC; Washington State Department of Natural Resources and Employment Security Department; Oregon State Department of Forestry and Department of Employment; California State Department of Employment and Department of Conservation; Montana State Forester and State Employment Service; Idaho State Department of Public Lands and Department of Employment; Alaska State Department of Labor and Department of Natural Resources of the Division of Lands; U.S. Department of Commerce; U.S. Department of the Interior, Bureau of Land Management and Bureau of Indian Affairs; British Columbia Department of Industrial Development, Trade, and Commerce; and a number of private industry associations, firms, and individuals.

The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Seattle Customs District includes all coastal and inland ports in the State of Washington, except Longview and Vancouver. Columbia-Snake Customs District includes all Oregon ports and Longview and Vancouver, Washington. Anchorage Customs District is the State of Alaska. San Francisco Customs District includes Monterey and all ports north of Monterey, California.

The statistical data are from secondary sources and are brought together to make such information more readily available. Sources are indicated for each table and can be contacted directly for means used in data collection.

Readers are cautioned that unit values should not be interpreted as accurate indicators of prices. Unit values for individual trade flows, especially those involving small volumes, frequently vary widely within a year, across origins or destinations, and through time.

AUTHOR

DEBRA D. WARREN is an economist, Pacific Northwest Research Station, Suite 200, 1221 SW Yamhill, Portland, OR. The mailing address is P.O. Box 3890, Portland, OR 97208-3890. The phone number is 503/321-5801.

Western Lumber Production and Prices

- *Softwood lumber production*

A total of 17.4 billion board feet of softwood lumber was produced in the Western United States in 1993, and the total U.S. figure was 33.1 billion board feet (table 1). Total softwood lumber production in the first quarter of 1994 was 8.5 billion board feet, and 54 percent of that was produced in the West.

- *Wholesale lumber prices increase*

Average wholesale prices rose in 1993 for selected lumber products (table 7). Compared with fourth quarter 1993 average values, first quarter 1994 changes ranged from a 5.4-percent increase for spruce-pine-fir, to a 14.6-percent increase for Douglas-fir std. and btr.

Plywood Production and Prices

- *Plywood production increases*

United States softwood structural panel board production in 1993, at 25,873 million square feet (3/8-inch basis), increased 2.2 percent from 1992. Production in the first quarter of 1994 was down only 0.3 percent from fourth quarter 1993 (table 1).

Wholesale prices of selected plywood products increased significantly from 1992 to 1993. First quarter 1994 prices averaged an 11.0-percent decrease (table 8) over fourth quarter 1993 prices.

Employment in Forest Products Industries

- *Employment numbers fall in 1993*

The number of persons employed in the lumber and wood products industries decreased in 1993 in Alaska, Washington, and Oregon (tables 21 and 23).

In Oregon and Washington, there were 12.0 direct jobs per million board feet of timber harvested in 1993 (using the preliminary harvest figure from table 16).

Log, Pulp, and Chip Exports

- *Washington and Oregon log exports decrease in 1993*

Log exports from Washington and Oregon ports totaled 1,707.6 million board feet in 1993, as compared to 2,181.7 million board feet in 1992. In the first quarter of 1994, Washington Customs District exported 222.4 million board feet of logs to all countries, and Oregon Customs District exported 166.4 (table 25).

- *Log export prices up sharply*

Softwood log exports from Washington and Oregon ports averaged \$984.51 (per thousand board feet) in 1993, up from the 1992 average of \$687.01. Most of the first quarter 1994 values increased, compared to fourth quarter 1993 (table 27).

- *Log exports increase in California and Alaska in 1993*

San Francisco Customs District exported 47.0 percent more logs in 1993 than in 1992 (table 28). The Anchorage Customs District exported 5.8 percent more logs in 1993 than in 1992 (table 29).

- *Pulp volumes drop in 1993*

The four western customs districts showed a decrease in pulp export volumes from 1992 to 1993 (table 46); however, the first quarter 1994 showed an increase.

- *Average value of pulp exports fluctuate slightly*

Most customs districts indicated minor fluctuations in the average values for both grades of pulp exports from 1992 to 1993 (table 47).

- *Chip exports increase in two customs districts*

Seattle and Anchorage Customs Districts reflected an increase in the volume of chips exported in 1993. Average values of chips remain fairly stable (table 48).

Lumber, Plywood, and Veneer Exports

- *Lumber export volumes down--except Alaska*

The lumber export figures showed drops for most western customs districts from 1992 to 1993 (tables 49, 53, and 54). The Columbia-Snake Customs District had a decrease of 12.0 percent from 1992, and the Seattle Customs District dropped 8.7 percent. Both northern and southern California lumber exports dropped. Alaska, however, increased lumber export volumes by 11.2 percent from 1992 to 1993.

- *Average value of lumber higher*

In the Seattle and Columbia-Snake Customs Districts, the average value of lumber exports rose from \$651.38 (per thousand board feet) in 1993 to \$712.30 in the first quarter of 1994 (table 51). Northern California (table 53) lumber export prices also increased.

Timber Sold by Forest Service Regions

- *Lumber imports increase*

The Seattle Customs District imported nearly 3.3 billion board feet of lumber in 1993, mostly from Canada (table 67). The Columbia-Snake Customs District imported 19.6 million board feet in 1993, compared with only 6.4 million in 1992 (table 69).

- *Plywood exports decrease*

The 1993 plywood exports decreased from Oregon and Washington combined. The average values showed increases in 1993.

- *Softwood veneer exports increase in 1993*

Compared with 1992, softwood veneer exports were up 38.7 percent in Oregon and Washington in 1993 (table 73). Veneer export values remained pretty much the same for 1993.

- *Sold volume in Northern Region is down for 1993*

The amount of timber sold in Montana and northern Idaho dropped 21.0 percent from 1992 to 1993 (table 74). The average values for all owners increased from \$180.04 in 1992 to \$321.28 in 1993 (table 75).

- *Sold volume drops in northern California*

In 1993, the volume of timber sold on all lands in northern California decreased 47.5 percent from the 1992 total (table 82). The average value of timber sold, however, increased from \$135.65 in 1992 to \$239.34 in 1993 (table 83).

- *Sold volume in Washington and Oregon decreases*

Oregon and Washington showed a decrease of 9.5 percent in the amount of timber sold on public lands from 1992 to 1993 (table 88). Average prices for 1993 have increased from \$274.26 in 1992 to \$414.01 in 1993 (table 89).

- *Alaskan National Forests show a drop in timber sold*

In 1993, the volume of timber sold on National Forest lands in Alaska decreased 56.9 percent from 1992 (table 94). Average values increased fairly substantially.

^a Includes eastern Washington, eastern Oregon, California (except redwood region), Nevada, Idaho, Montana, Wyoming, Utah, Colorado, Arizona, New Mexico, and a portion of South Dakota.

^b Western hemlock and white fir. Before 1979, hemlock was included in "Other softwoods"; since 1979, hemlock is included in "Hem-fir." The historical data are revised to reflect this change.

^a Since January 1983, structural panel board includes plywood, waferboard, and oriented strand board (OSB). Before 1983, statistics refer to plywood production in the United States.

^b Includes Alabama, Arkansas, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Texas, and Virginia.

^c Includes Maine, Michigan, Minnesota, New Hampshire, New York, and Wisconsin.

Note: Individual columns may not add to totals because of rounding.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) including inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

^a Great Falls Customs District includes all ports in Montana and Idaho.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Seattle Customs District includes all ports in the State of Washington, except Longview and Vancouver. Columbia-Snake Customs District includes all Oregon ports and Longview and Vancouver, Washington. San Francisco Customs District includes all coastal and inland ports in the State of California from Monterey north. The Anchorage Customs District is the State of Alaska.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^b Does not include cull log prices.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Before 1984, prices for stumpage on National Forest lands are statistical high bids. The statistical high bid is defined as the bid price minus credits for road costs; it includes an allowance for sale-area betterment (K-V funds). Beginning in 1984, prices for stumpage on National Forest land are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Before 1984, prices for stumpage on National Forest lands are statistical high bids. The statistical high bid is defined as the bid price minus credits for road costs; it includes an allowance for sale-area betterment (K-V funds). Beginning in 1984, prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^a Prices for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Before 1984, prices for stumpage on National Forest lands are statistical high bids. The statistical high bid is defined as the bid price minus credits for road costs; it includes an allowance for sale-area betterment (K-V funds). Beginning in 1984, prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^b Includes Port-Orford-cedar.

Source: Forest Service, U.S. Department of Agriculture. Pacific Northwest Region includes Oregon and Washington and a small portion of northern California.

^a Fiscal year ending March 31.

^b Factors to convert cubic meters to board feet, Scribner scale, vary according to size and quality of timber. Size and quality may vary from one year to the next and between the coast and interior regions. For the coast, the approximate conversion factor lies between 5.0 and 6.0 cubic meters per 1,000 board feet; for the interior, between 5.75 and 6.5 cubic meters per 1,000 board feet.

^c Average stumpage prices do not reflect the effect of road and other credits against stumpage as authorized under section 88 of the British Columbia Forest Act of 1978.

^d Includes portions of Cariboo, Prince Rupert, and Vancouver forest regions.

^e Includes Kamloops, Nelson, Prince George, and portions of Cariboo, Prince Rupert, and Vancouver forest regions.

Warren, Debra D. 1994. Production, prices, employment, and trade in Northwest forest industries, first quarter 1994. Resour. Bull. PNW-RB-204. Portland, OR: U.S. Department of Agriculture, Forest Service, Pacific Northwest Research Station. 130 p.

Provides current information on lumber and plywood production and prices; employment in the forest industries; international trade in logs, lumber, and plywood; volume and average prices of stumpage sold by public agencies; and other related items.

Keywords: Forestry business economics, lumber prices, plywood prices, timber volume, stumpage prices, employment (forest products industries), marketing (forest products), imports and exports (forest products).

The **Forest Service** of the U.S. Department of Agriculture is dedicated to the principle of multiple use management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the States and private forest owners, and management of the National Forests and National Grasslands, it strives—as directed by Congress—to provide increasingly greater service to a growing Nation.

The United States Department of Agriculture (USDA) is a diverse organization committed to equal opportunity in employment and program delivery. USDA prohibits discrimination on the basis of race, color, national origin, sex, religion, age, disability, political affiliation, and familial status. Persons believing that they have been discriminated against should contact the Secretary, U.S. Department of Agriculture, Washington, DC 20250, or call 202-720-7327 (voice), or 202-720-1127 (TDD).
