Abstract

Ledig, F. Thomas; Neale, David B., compilers, 1998. **World directory of forest geneticists and tree breeders.** Gen. Tech. Rep. PSW-GTR-170. Albany, CA: Pacific Southwest Research Station, Forest Service, U.S. Department of Agriculture; 189 p.

A formal task of the Forest Genetic Resources Study Group/North American Forestry Commission/Food and Agriculture Organization of the United Nations and Working Party 2.04.09 / Division 2- Physiology and Genetics /International Union of Forest Research Organizations, this international directory lists more than 1,800 forest geneticists and tree breeders from 86 countries. Each listing includes the entrant's title, mailing address, phone and fax numbers, and email address, when available. Indices organize entrants by country, by alphabetical order, by taxa of interest, and by research subjects.

Retrieval Terms: forest genetics

The Compilers

F. Thomas Ledig is senior scientist and **David B. Neale** is research plant molecular geneticist, Institute of Forest Genetics, Pacific Southwest Research Station, Forest Service, U.S. Department of Agriculture, Albany, California.

Compilation of this Directory was a task of the

Forest Genetic Resources Study Group
North American Forestry Commission
Food and Agricultural Organization of the United Nations
and
Working Party 2.04.09

INTRODUCTION

The first World Directory of Forest Geneticists and Tree Breeders was published in 1970 as an appendix to the Proceedings of the Second World Consultation on Forest Tree Breeding, held in Washington, DC from August 7-16, 1969. The second, updated Directory was published in 1977 as a separate volume at the Third World Consultation on Forest Tree Breeding, held in Canberra, Australia from March 21-26, 1977. Both versions were compiled by Hans Nienstaedt. The 1977 Directory has been updated twice in the intervening years and made available as computer output.

PREPARATION OF THE DIRECTORY

Work on this present version was begun in 1995. To update listings, forms were mailed to those in the 1977 Directory, to those who had been entered in the periodic updates, and to names gathered from several other mailing lists and to authors of papers in the forest genetics literature. By June 1995 the Directory was available on the World Wide Web: **http://dendrome.psw.fs.fed.us/Colleague/** or **http://s27w007.psw.fs.fed.us/Colleague/.**

After a draft of the Directory was completed, the listings for each country or region were mailed to contacts for those areas. The contacts were asked to make any obvious corrections and, particularly, to see if they knew of anyone omitted. If omissions were identified, they were sent forms and asked to complete them if they wished to be listed. This process was not completed until late 1997. The Directory should be considered current as of April 1, 1998. However, a directory is never really current.

Despite every attempt to make this Directory accurate and complete, it undoubtedly is not. Although we advertised in the IUFRO News and elsewhere, some whom should have been included will have been missed. Retirements, shifts to new positions, and our own mortality result in constant change. In addition, we have almost surely misinterpreted some of the returned forms or have introduced typographical errors — for that we apologize. Nevertheless, we believe that the Directory will be useful in contacting colleagues, forming alliances, fostering communication, and in exchanging information and genetic resources.

Maintaining a directory will be easier in the future. Scientists and tree breeders wishing to list their names and those who have changed positions or addresses and wishing to update their information can do so by using the on-line registration form at the DENDROME World Wide Web server: **http://dendrome.psw.fs.fed.us/Colleague/** or **http://s27w007.psw.fs.fed.us/Colleague/.**

Alternatively, those who wish to change their listing, or those who wish to list for the first time, will find a modified form included in this Directory as an appendix. This form may be reproduced and distributed freely.

As should be obvious, many changes occurred in the last two decades. The present edition includes 1830 names. By comparison, the 1977 version of the Directory, the last published version, listed 1097 names. The 86 countries included in this Directory are listed in the Contents.

USE OF THE DIRECTORY

The Directory is explained below in outline and then in more detail with regard to language, names, addresses, country names, phone numbers, and taxa and subject indices.

The first section of the Directory lists names arranged by country. Within country, names are listed alphabetically. The mailing address, phone and fax numbers, and e-mail address, if available, follow in that order.

In some cases, the user may wish to contact a colleague but is not sure what country to search. For example, a colleague may have moved to a new position in another country. Therefore, the second section lists all names in alphabetic order and indicates the country of current residence.

A third section lists names grouped by taxa of interest. Taxa are categorized at the level of genus or higher. To have organized the Directory by species would have resulted in an overwhelming number of entries. Scientists and breeders often work on several species within a genus.

The fourth and final section lists names grouped by subject or subdisciplinary area of interest. The subject matter list is quite different from the one that was used to organize the 1977 Directory because it reflects advances in the science of genetics and the practice of breeding that have occurred in the last two decades.

Language. This Directory is essentially an English-language directory. However, in listing respondents' institutions and addresses we tried to use their native language when it was a language that employed some version of the Roman alphabet (also called the Latin alphabet), such as German, French, and Spanish. Many respondents translated their institution's name into English, however, and we were not competent to translate it back into their native language. Therefore, within the same country the institution may appear in its English equivalent for one respondent and in its native form for another respondent. Likewise, respondents handled the

question of diacritical marks in various ways. We used accents and other diacritical marks when they were supplied, but could not add them when they were absent. For these reasons, the spelling of institutions and addresses may be inconsistent.

Names. We have used the English system of placing the given name first and the family name last. Here too, we may have erred if a respondent reversed them from the order that we anticipated. For Hispanic cultures in which a mother's family name follows the father's family name, we have hyphenated the two in an attempt to help the user in deciding the correct form of address (e.g., Dr. Basilio Bermejo-Velazquez should be addressed as Dr. Bermejo or Dr. Bermejo V. but NOT as Dr. Velazquez. We attempted to reproduce diacritical marks. Some respondents may have omitted diacritical marks because they assumed that we could not handle them in an English-language directory; therefore, the listings may be inconsistent.

Titles. The second line of most entries is the respondent's official title, such as "Professor of Silviculture" or "Director". However, for those respondents that did not indicate a title (independent of their form of address, such as "Ing." or "Dr.", which was included on the first line of the entry), the second line begins their address. We hope that this will be obvious to users.

Addresses. We attempted to present the addresses in the order from smallest unit of organization to the largest. For example, a depai talent or laboratory within a university will be given on one line and the university on the next. Street or postal box number precedes the city, which precedes the state, province, or district. Because so many different systems exist for presenting addresses, we may have misinterpreted some forms. However, we think that the addresses as presented here are usable.

Country Names. The country names here are the English equivalents as used in the United States and are not the official names of the countries. For example, the official name of "Mexico" is Estados de Unidos de Mexico and the official name of "Korea" is the Republic of Korea. We combined entries from England and Scotland under "United Kingdom", and we listed the People's Republic of China as "China" and the Republic of China as "Taiwan", which is consistent with generally accepted usage by the United States Postal Service. We hope that no one will be offended by these shorthand treatments of their national identities. We used short forms because we felt they were more generally known, and people were more likely to seek them as such in an alphabetical list.

Telephone and Fax Numbers. This version of the Directory is the first in the series to list telephone and fax numbers. We presented the country code first, followed by an area or city code. The area or city codes are in parentheses to distinguish them from the rest of the number, because when calling from one number within an area code to another within the same area, the area codes are usually not dialed. It complicates calling when area or city codes are not distinguished from the telephone number proper. When the area or city code began with a zero,

we dropped the zero; leading zeroes are not dialed in international calling. We assumed that the main purpose of the Directory was to facilitate international contacts, and the leading zero will be understood by intra-national callers.

Email. This version of the Directory is also the first to list e-mail addresses, an increasingly frequent point of contact.

Taxa and Subjects. The lists and indices by taxa and by subject area may be the most valuable aspect of the Directory to those forming new working groups, organizing conferences and workshops, or developing mailing lists for newsletters and annual reports.

Users may wish to construct mailing lists based on subject and taxa. This can be done mechanically using the indices. Nevertheless, it would be simpler using a computer. Therefore, we can make the Directory available on a 3.5-inch computer disc in which the taxa and subject area codes are listed with each entry. The disc is written in WordPerfect 5.1.

We asked that respondents restrict themselves to 4 taxa and 10 subjects of interest. We apologize if this meant that some of our colleagues could not fully express their range of interests. Because of this restriction, we suggest that anyone wishing to contact scientists or breeders in a subfield also contact those who listed one of the major headings. For example, a molecular geneticist may be interested in a dozen or more of the 14 fields listed under "2000 Molecular Genetics and Biotechnology", but because of the restriction, would be listed in our indices under only this main heading.

Some respondents failed to list their interests in taxa or subject areas or both; 15 of the respondents failed to list taxa and 11 did not list subject area interests. Thus, these respondents do not appear in the respective indices. We may have erred by placing the forms on two sides of the same sheet so that many overlooked one or the other, but we made numerous attempts to recontact these respondents, to no avail.

ACKNOWLEDGEMENTS

We thank Brad Sherman for helping to establish the Directory on DENDROME World Wide Web server and to Emily Gladstone, Rebecca A. Wren, Jaqueline L. Mezera, Kim Marshall, and Diane Delany for entering and verifying the hundreds of forms received. Special thanks to Cynthia Collins for preparing the Directory for publication and to Lisa F. Brown for organizing the Directory by subject and taxa. Most importantly, thanks to the many forest geneticists and tree breeders who took the time to fill out the entry forms. We hope that this Directory will prove useful to you.

SUBJECT AREA INDEX

LIST OF SUBJECT AREAS

1100 FOREST GENETICS -- GENERAL

1200 CLONAL FORESTRY
1210 clone testing

1300 CONSERVATION OF GENETIC RESOURCES
1310 conservation biology
1320 In Situ reserves
1330 Ex Situ gene banks
1340 plant collecting

1400 CYTOGENETICS
1410 cytology
1420 karyotypes
1430 meiosis and mitosis
1440 polyploidy, aneuploidy, and haploidy

1500 DEVELOPMENTAL GENETICS
1510 epigenetic and phase changes
1520 somatic cell genetics

1600 EDUCATION

1700 EVOLUTION
1710 biogeography
1725 genecology and ecological genetics
1730 genetic drift
1735 genetic load
1740 genetic structure
1745 gene flow, migration, dispersal and colonization
1750 natural variation
1755 paleobotany
1760 population genetics (F-statistics, heterozygosity, neighborhood size)
1765 selection
1770 speciation

1800 EXOTICS
1810 homoclimes
1820 species trials

1900 HYBRIDIZATION
1910 heterosis
1920 interspecific hybridization
1930 intraspecific hybridization
1940 introgression
1950 isolating mechanisms

2000 MOLECULAR GENETICS AND BIOTECHNOLOGY
2010 DNA sequencing
2015 gene cloning
2020 genome mapping
2025 gene regulation and expression
2030 gene transfer
2035 genetic engineering
2040 In Vitro hybridization
2045 marker aided selection
2050 monoclonal antibodies
2055 organelle diversity and inheritance
2060 PCR-based genetic markers
2065 quantitative trait loci
2070 RAPDs
2075 RFLPs

2100 MUTATION
2110 chemical mutagens 2120 radiation
2130 rate of mutation

2200 PHYSIOLOGICAL GENETICS
2210 drought tolerance
2220 flooding tolerance
2225 salt tolerance
2230 frost tolerance
2235 nutrition
2240 hormones
2250 metabolism
2260 phenology and dormancy
2270 respiration
2280 photosynthesis 2290 seed physiology

2300 POLICY, LEGISLATION AND CERTIFICATION
2310 certification of reproductive materials
2320 endangered species legislation
2330 quarantine

2400 PROTECTION
2410 disease resistance
2420 pest resistance
2430 pollution resistance

2500 QUANTITATIVE GENETICS
2510 experimental design
2520 genetic correlation
2530 heritability
2540 sampling
2550 selection indices
2560 variance components

2600 REPRODUCTIVE BIOLOGY
2610 embryology
2620 fecundity and seed crop periodicity
2630 floral biology
2640 flower induction
2650 mating systems (inbreeding, outcrossing)
2660 pollination and fertilization
2670 self-incompatibility and infertility

2700 SYSTEMATICS
2710 biochemical systematics
2720 cladistics
2730 crossability patterns
2740 numerical taxonomy

2800 TREE IMPROVEMENT
2804 agroforestry
2805 biomass fuel
2810 breeding methods
2815 controlled pollination
2820 economics
2825 juvenile-mature correlation and early selection
2830 genetics in silviculture
2835 genotype x environment interaction
2840 mating designs
2845 nut and fruit breeding
2850 ornamental horticulture
2855 pollen handling, storage, testing, and management
2860 progeny testing
2865 provenance testing
2870 seed harvesting, handling, storage, and testing
2875 seed orchard design and management
2880 seed and cone pests
2885 seed production areas
2890 seed zones
2895 somaclonal selection

2900 VARIATION AND INHERITANCE
2910 bark characteristics
2920 crown and stem form
2930 isozymes
2940 polyphenolics
2950 terpenoids
2960 wood properties

3000 VEGETATIVE PROPAGATION
3010 cell, tissue, and organ culture
3020 grafting
3030 rooting
3040 somaclonal variation
3050 somatic embryogenesis
3060 somatic hybridization

APPENDIX

World Directory of Forest Geneticists and Tree Breeders

Please print neatly. Include accents and diacritical marks. Do not abbreviate.

Name

Family Name(s) _____
For Latin America, please hyphenate the maternal name (e.g., Vargas-Hernández)

Given Name(s) _____
For example: Robert M. or Robert Michael

Suffix _____
For example: Jr., III

Form of Address _____
For example: Professor, Dr., Docent, Ing., Mr., Mrs., Ms.

Official Title _____
For example: Director, Research Scientist, Associate Professor

Institutional Mailing Address

Department _____

Organization _____

Street or Box _____

City or Town _____

State or Province and Postal Code _____

Country _____

Contact Information

Telephone _____ (Country Code) _____ (City or Area Code) _____ (Number)

Fax _____ (Country Code) _____ (City or Area Code) _____ (Number)

Email _____

LIST OF SUBJECT AREAS

1100 FOREST GENETICS -- GENERAL

1200 CLONAL FORESTRY
1210 clone testing

1300 CONSERVATION OF GENETIC RESOURCES
1310 conservation biology
1320 In Situ reserves
1330 Ex Situ gene banks
1340 plant collecting

1400 CYTOGENETICS
1410 cytology
1420 karyotypes
1430 meiosis and mitosis
1440 polyploidy, aneuploidy, and haploidy

1500 DEVELOPMENTAL GENETICS
1510 epigenetic and phase changes
1520 somatic cell genetics

1600 EDUCATION

1700 EVOLUTION
1710 biogeography
1725 genecology and ecological genetics
1730 genetic drift
1735 genetic load
1740 genetic structure
1745 gene flow, migration, dispersal and colonization
1750 natural variation
1755 paleobotany
1760 population genetics (F-statistics, heterozygosity, neighborhood size)
1765 selection
1770 speciation

1800 EXOTICS
1810 homoclimes
1820 species trials

1900 HYBRIDIZATION
1910 heterosis
1920 interspecific hybridization
1930 intraspecific hybridization
1940 introgression
1950 isolating mechanisms

2000 MOLECULAR GENETICS AND BIOTECHNOLOGY
2010 DNA sequencing
2015 gene cloning
2020 genome mapping
2025 gene regulation and expression
2030 gene transfer
2035 genetic engineering
2040 In Vitro hybridization
2045 marker aided selection
2050 monoclonal antibodies
2055 organelle diversity and inheritance
2060 PCR-based genetic markers
2065 quantitative trait loci
2070 RAPDs
2075 RFLPs

2100 MUTATION
2110 chemical mutagens
2120 radiation
2130 rate of mutation

2200 PHYSIOLOGICAL GENETICS
2210 drought tolerance
2220 flooding tolerance
2225 salt tolerance
2230 frost tolerance
2235 nutrition
2240 hormones
2250 metabolism
2260 phenology and dormancy
2270 respiration
2280 photosynthesis
2290 seed physiology

2300 POLICY, LEGISLATION AND CERTIFICATION
2310 certification of reproductive materials
2320 endangered species legislation
2330 quarantine

2400 PROTECTION
2410 disease resistance
2420 pest resistance
2430 pollution resistance

2500 QUANTITATIVE GENETICS
2510 experimental design
2520 genetic correlation
2530 heritability
2540 sampling
2550 selection indices
2560 variance components

2600 REPRODUCTIVE BIOLOGY
2610 embryology
2620 fecundity and seed crop periodicity
2630 floral biology
2640 flower induction
2650 mating systems (inbreeding, outcrossing)
2660 pollination and fertilization
2670 self-incompatihility and infertility

2700 SYSTEMATICS
2710 biochemical systematics
2720 cladistics
2730 crossability patterns
2740 numerical taxonomy

2800 TREE IMPROVEMENT
2804 agroforestry
2805 biomass fuel
2810 breeding methods
2815 controlled pollination
2820 economics
2825 juvenile-mature correlation and early selection
2830 genetics in silviculture
2835 genotype x environment interaction
2840 mating designs
2845 nut and fruit breeding
2850 ornamental horticulture
2855 pollen handling, storage, testing, and management
2860 progeny testing
2865 provenance testing
2870 seed harvesting, handling, storage, and testing
2875 seed orchard design and management
2880 seed and cone pests
2885 seed production areas
2890 seed zones
2895 somaclonal selection

2900 VARIATION AND INHERITANCE
2910 bark characteristics
2920 crown and stem form
2930 isozymes
2940 polyphenolics
2950 terpenoids
2960 wood properties

3000 VEGETATIVE PROPAGATION
3010 cell, tissue, and organ culture
3020 grafting
3030 rooting
3040 somaclonal variation
3050 somatic embryogenesis
3060 somatic hybridization

_____

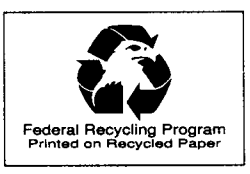
The Forest Service, U.S. Department of Agriculture, is responsible for Federal Leadership in forestry.

It carries out this role through four main activities:

- Protection and management of resources on 19I million acres of National Forest System lands
- Cooperation with State and local governments, forest industries, and private landowners to help protect and manage non-Federal forest and associated range and watershed lands
- Participation with other agencies in human resource and community assistance programs to improve living conditions in rural areas
- Research on all aspects of forestry, rangeland management, and forest resources utilization.

The Pacific Southwest Research Station

- Represents the research branch of the Forest Service in California, Hawaii, American Samoa, and the western Pacific.



The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at

202-720-2600 (voice and TDD).

To file a complaint of discrimination, write

USDA, Director
Office of Civil Rights
Room 326-W, Whitten Building
14th and Independence Avenue, SW
Washington, DC 20250-9410

or call

(202) 720-5964 (voice or TDD).
USDA is an equal opportunity provider and employer.
