Publications of the Northeastern Research Station: 1998

This publication/database reports research involving pesticides. It does not contain recommendations for their use, nor does it imply that the uses discussed here have been registered. All uses of pesticides must be registered by appropriate State and/or Federal, agencies before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, and fish or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

The use of trade, firm, or corporation names in this publication is for the information and convenience of the reader. Such use does not constitute an official endorsement or approval by the U.S. Department of Agriculture or the Forest Service of any product or service to the exclusion of others that may be suitable.

NE PUBLICATIONS—1998

Most Station publications (Research Papers, Research Notes, General Technical Reports, and Resource Bulletins) are available from USDA Forest Service, 359 Main Road, Delaware, OH 43015. Attn: Publications Group. For copies of articles not published by the Station, contact a university library or the Northeastern Research Station author or co-author. A list of Station authors by location follows the citations. Full mailing addresses for headquarters and field locations are shown on the inside back cover.
