ERRATUM / ERRATUM

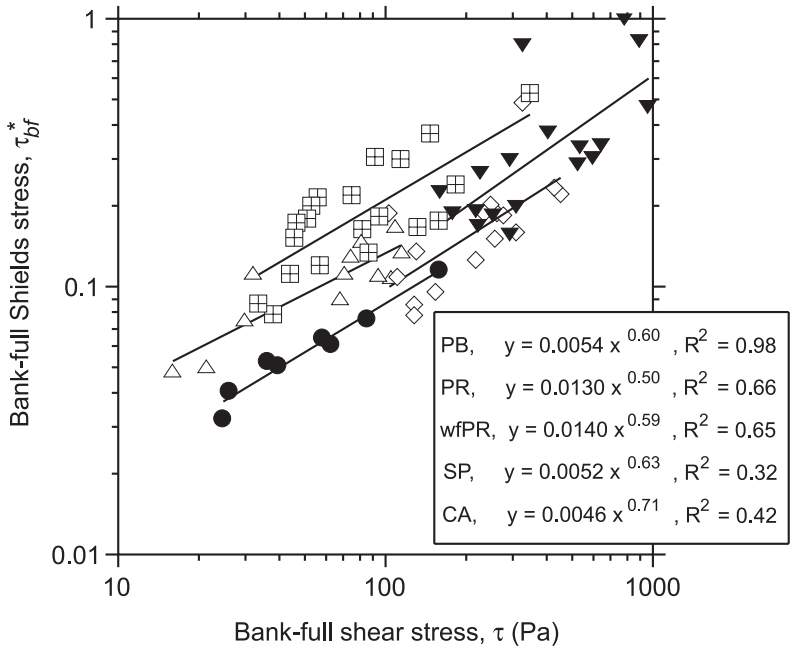
Erratum: Basin-scale availability of salmonid spawning gravel as influenced by channel type and hydraulic roughness in mountain catchments

John M. Buffington, David R. Montgomery, and Harvey M. Greenberg

Ref.: Can. J. Fish. Aquat. Sci. **61**: 2085–2096 (2004).

Plane-bed and pool–riffle channels were incorrectly identified in the caption for Fig. 2. The second sentence of the caption should have read "... PB, plane-bed (circles); PR, pool–riffle (open triangles)...". In addition, the exponents reported in Fig. 2 for PR, wfPR, SP, and CA channels should have read 0.50, 0.59, 0.63, and 0.71, respectively. The corrected figure is shown.

Fig. 2. Bank-full Shields stress (τ^*_{bf}) as a function of total bank-full shear stress (τ) and channel type in Pacific Northwest rivers (morphologic definitions of Montgomery and Buffington 1997, 1998; Buffington et al. 2003). PB, plane-bed (circles); PR, pool–riffle (open triangles); wfPR, wood-forced pool–riffle (squares); SP, step–pool (diamonds); CA, cascade (solid triangles). PB, PR, and wfPR data are from Buffington and Montgomery (1999*a*, 2001); SP and CA data are from Montgomery and Buffington (1997).



Received 19 September 2006. Accepted 20 September 2006. Published on the NRC Research Press Web site at http://cjfas.nrc.ca on 6 October 2006.
