

# Timber Product Output and Use Kentucky, 2018

Kentucky forests accounted for a total of 155,196 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 152,865 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Kentucky. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

**Kentucky had a total production of 155,196 MCF in 2018.**

**There are about 239 primary wood processing mills accounting for production in the State.**

Statewide roundwood production (% of total) by product

|                    |        |  |
|--------------------|--------|--|
| Saw logs           | 88.74% |  |
| Miscellaneous      | 9.84%  |  |
| Bioenergy/Fuelwood | 1.41%  |  |

Total roundwood production over time

■ Hardwood ■ Softwood

- Biomass/energy plant
- Misc - Concentration/export yard
- + Miscellaneous mill
- × Post mill
- \* Pulp/Paper mill
- ◇ Saw mill (includes coop/stave, handle)
- △ Veneer/plywood mill

Kentucky imported 22,296 MCF into the State and exported 24,627 MCF out of the State making them a net exporter of roundwood.
