

Timber Product Output and Use North Carolina, 2018

North Carolina forests accounted for a total of 832,522 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 810,608 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in North Carolina. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

North Carolina had a total production of 832,522 MCF in 2018.

There are about 201 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	42.87%	Blue
Pulpwood	32.24%	Orange
Bioenergy/Fuelwood	12.68%	Red
Miscellaneous	8.08%	Green
Veneer logs	3.82%	Yellow
Poles/Posts/Pilings	0.31%	Brown

North Carolina imported 105,045 MCF into the State and exported 126,959 MCF out of the State making them a net exporter of roundwood.

Total roundwood production over time

Hardwood

Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
