

Timber Product Output and Use Texas, 2018

Texas forests accounted for a total of 480,366 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 476,610 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Texas. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Texas had a total production of 480,366 MCF in 2018.

There are about 56 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	34.77%	■
Pulpwood	32.25%	■
Miscellaneous	26.54%	■
Veneer logs	6.43%	■

Total roundwood production over time

■ Hardwood ■ Softwood

- Composite Panel/Eng. Wood Product mill
- * Miscellaneous mill
- ▽ Pulp/Paper mill
- ◁ Saw mill (includes coop/stave, handle)
- ▷ Veneer/plywood mill

■ H
■ H/S
■ S

Texas imported 80,402 MCF into the State and exported 84,158 MCF out of the State making them a net exporter of roundwood.

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
