

Timber Product Output and Use Alabama, 2019

Alabama forests accounted for a total of 1,122,681 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 1,149,263 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Alabama. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Biomass/energy plant
- Composite Panel/Eng. Wood Product mill
- △ Pole mill
- ▽ Pulp/Paper mill
- ▴ Saw mill (includes coop/stave, handle)
- ◇ Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

Alabama had a total production of 1,122,681 MCF in 2019.

There are about 120 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Pulpwood	50.97%	■
Saw logs	31.37%	■
Veneer logs	6.19%	■
Composite panel	5.12%	■
Bioenergy/Fuelwood	5.07%	■
Poles	1.27%	■

Alabama imported 203,464 MCF into the State and exported 176,882 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Hardwood ■ Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
