

Timber Product Output and Use Georgia, 2019

Georgia forests accounted for a total of 1,379,871 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 1,400,454 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Georgia. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Georgia had a total production of 1,379,871 MCF in 2019.

There are about 189 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Pulpwood	42.06%	
Saw logs	34.42%	
Bioenergy/Fuelwood	9.39%	
Composite panel	6.30%	
Miscellaneous	3.12%	
Veneer logs	3.08%	
Poles	1.15%	
Posts	0.48%
