

Timber Product Output and Use Kentucky, 2019

Kentucky forests accounted for a total of 149,727 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 162,894 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Kentucky. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Kentucky had a total production of 149,727 MCF in 2019.

There are about 230 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	82.78%	
Miscellaneous	13.28%	
Bioenergy/Fuelwood	3.93%	

Total roundwood production over time

■ Hardwood ■ Softwood

- Biomass/energy plant
- ✕ Misc - Concentration/export yard
- * Miscellaneous mill
- ▽ Post mill
- △ Pulp/Paper mill
- ▷ Saw mill (includes coop/stave, handle)
- Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

Kentucky imported 24,219 MCF into the State and exported 11,052 MCF out of the State making them a net importer of roundwood.

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
