

Timber Product Output and Use North Carolina, 2019

North Carolina forests accounted for a total of 818,562 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 827,468 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in North Carolina. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Softwood

North Carolina had a total production of 818,562 MCF in 2019.

There are about 191 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	41.21%	■
Pulpwood	33.59%	■
Bioenergy/Fuelwood	12.79%	■
Miscellaneous	8.13%	■
Veneer logs	4.01%	■
Posts	0.27%	■

North Carolina imported 110,299 MCF into the State and exported 101,393 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Hardwood ■ Softwood
