

Timber Product Output and Use South Carolina, 2019

South Carolina forests accounted for a total of 818,313 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 745,990 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in South Carolina. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

South Carolina had a total production of 818,313 MCF in 2019.

There are about 98 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Pulpwood	43.72%	■
Saw logs	35.38%	■
Composite panel	7.79%	■
Bioenergy/Fuelwood	6.76%	■
Veneer logs	3.41%	■
Poles	1.95%	■
Miscellaneous	0.99%	■

South Carolina imported 51,920 MCF into the State and exported 124,243 MCF out of the State making them a net exporter of roundwood.

Total roundwood production over time

■ Hardwood ■ Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
