Forests of South Carolina, 2020

63% forested*

South Carolina has an estimated **12,849,178** acres of forest land.

* Percent forest is forest area/total area. Percent forest with water removed from total area is 67%.

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in South Carolina. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

South Carolina has 3,638 sample plots across the State, of which 2,682 are currently forested. Each year, about 10-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 12/01/2021.

39,544 acres of nonforest revert back to forest annually*

51,754 acres of forest land convert annually* to nonforest

471,503 acres of forest land are treated by cutting (harvest, thinning, etc.) annually*

167,470 acres of forest land are disturbed annually* by fire

109,897 acres of forest land are disturbed annually* by weather events

USDA Forest Service - Forest Inventory & Analysis

The estimates presented are based on data retrieved from the FIA database (12/01/2021) and may not reflect the most recent data available from the FIA program. Note – this publication does not include estimates of uncertainty. The most current data and sampling error for the estimates above can be found by visiting <https://www.fia.fs.fed.us/>.

*Average annual estimates are based on data collected across 5-10 years and may not be indicative of the nominal year presented in the title by itself.
