

Timber Product Output and Use for: Maine, 2018

Maine forests accounted for a total of 391,402 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 426,822 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Maine. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Maine had a total production of 391,402 MCF in 2018.

There were about 224 primary wood processing mills in the State.

Statewide roundwood production (% of total) by product

Pulpwood	41.5%	
Saw logs	40.2%	
Bioenergy/Fuelwood	14.9%	
Miscellaneous*	3.3%	

*Misc. includes all roundwood uses not listed

Total roundwood production

Hardwood Softwood

Maine imported 84,713 MCF into the State and exported 49,293 MCF out of the State making them a net importer of roundwood.

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fs.usda.gov/research/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis TPO database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.
