

Timber Product Output and Use for: New York, 2018

New York forests accounted for a total of 80,873 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 81,172 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in New York. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- ★ Log homemill (incl. Viga/Latillamills)
- ▲ Miscellaneous mill
- ▼ Pole mill
- Pulp/Paper mill
- ✕ Saw mill (includes coop/stave, handle)
- * Veneer/plywood mill
- Red square: Hardwood
- Green square: Hardwood/Softwood
- Blue square: Softwood

New York had a total production of 80,873 MCF in 2018.

There were about 147 primary wood processing mills in the State.

Statewide roundwood production (% of total) by product

Miscellaneous*	51.4%	Red square
Saw logs	48.6%	Pink square

*Misc. includes all roundwood uses not listed

Total roundwood production

Red square: Hardwood
Blue square: Softwood

New York imported 14,749 MCF into the State and exported 14,450 MCF out of the State making them a net importer of roundwood.

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fs.usda.gov/research/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis TPO database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.
