

Timber Product Output and Use Arkansas, 2022

Arkansas forests accounted for a total of 646,421 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 608,800 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Arkansas. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Softwood

Arkansas had a total production of 646,421 MCF in 2022.

There were about 100 primary wood processing mills in the State.

Statewide roundwood production (% of total) by product

Saw logs	47.7%	
Pulpwood	40.3%	
Miscellaneous*	11.8%	
Poles/Posts/Pilings	0.2%	

*Misc. includes all roundwood uses not listed

Arkansas imported 53,762 MCF into the State and exported 91,383 MCF out of the State making them a net exporter of roundwood.

Total roundwood production

■ Hardwood ■ Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.usda.gov/program-features/tpo/index.php>

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis TPO database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no> Factsheet estimates may not match table estimates due to data refinements after factsheet publication.
