

Timber Product Output and Use Tennessee, 2022

Tennessee forests accounted for a total of 219,905 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 241,617 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Tennessee. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Biomass/energy plant
- Composite Panel/Eng. Wood Product mill
- ◇ Misc - Concentration/export yard
- Pulp/Paper mill
- × Saw mill (includes coop/stave, handle)
- * Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

Tennessee had a total production of 219,905 MCF in 2022.

There were about 171 primary wood processing mills in the State.

Statewide roundwood production (% of total) by product

Saw logs	51.9%	
Pulpwood	30.9%	
Miscellaneous*	17.2%	

*Misc. includes all roundwood uses not listed

Tennessee imported 72,370 MCF into the State and exported 50,658 MCF out of the State making them a net importer of roundwood.

Total roundwood production

■ Hardwood ■ Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.usda.gov/program-features/tpo/index.php>

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis TPO database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no> Factsheet estimates may not match table estimates due to data refinements after factsheet publication.
