

TIMBER PRODUCTS OUTPUT AND USE

2021 Arkansas Wood Flow Analysis

Arkansas forests accounted for a total of 644,192 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 622,469 MCF within the State.

This resource update presents estimates of wood flow derived from the findings of an annual survey conducted on a sample of all primary wood-using mills in Arkansas and complements the Timber Products Output factsheets providing additional summarized roundwood data. The annual survey was conducted to determine the amount and source of wood receipts and timber product imports/exports. Data used in this update were accessed from the FIA Timber Product Output database (page 3).

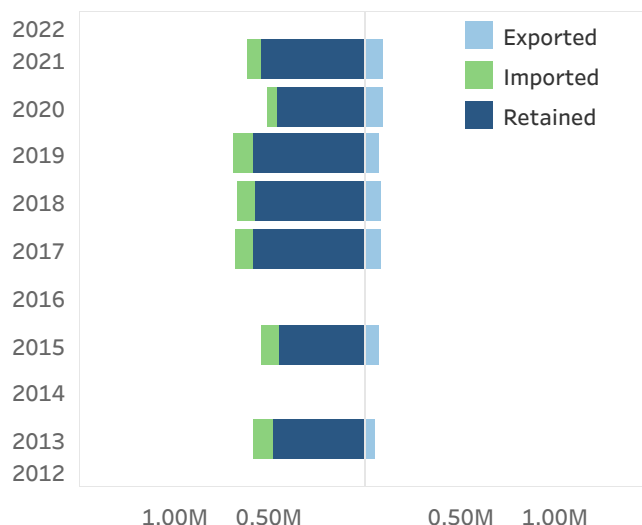

Arkansas retained 546,622 MCF and exported 97,569 MCF out of State for a total production of 644,192 MCF.

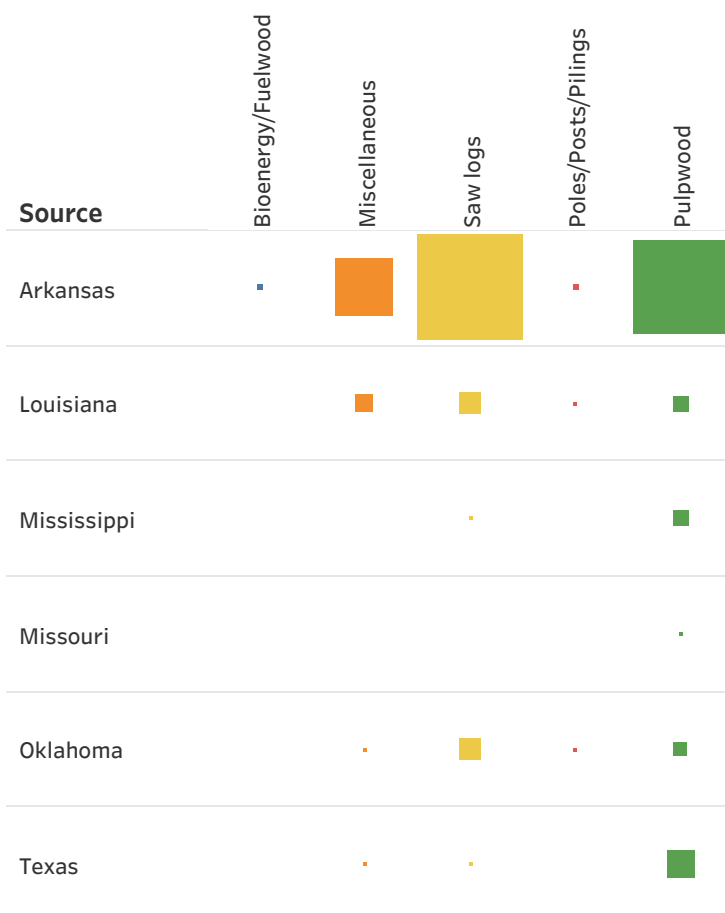

Arkansas retained 546,622 MCF and imported 75,847 MCF from other States for total receipts of 622,469 MCF.

Receipts (Retained and Imported Wood)

In 2021, Arkansas was a Net Exporter

Imports

Exports

Roundwood exports include volume transported to other U.S. States or other non-U.S. regions with Arkansas transporting 97,569 MCF in total exports for 2021. Softwood exports accounted for 85.16 percent, with hardwood being 14.84 percent of the total.
