

TIMBER PRODUCTS OUTPUT AND USE

2021 Georgia Wood Flow Analysis

Georgia forests accounted for a total of 1,347,924 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 1,392,874 MCF within the State.

This resource update presents estimates of wood flow derived from the findings of an annual survey conducted on a sample of all primary wood-using mills in Georgia and complements the Timber Products Output factsheets providing additional summarized roundwood data. The annual survey was conducted to determine the amount and source of wood receipts and timber product imports/exports. Data used in this update were accessed from the FIA Timber Product Output database (page 3).

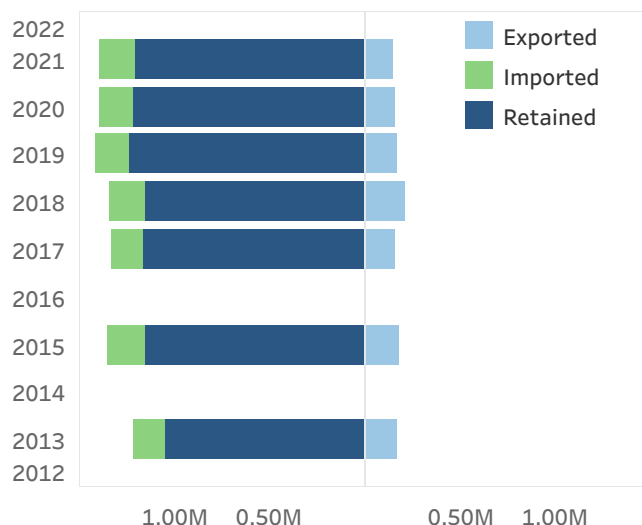

Georgia retained 1,204,620 MCF and exported 143,304 MCF out of State for a total production of 1,347,924 MCF.

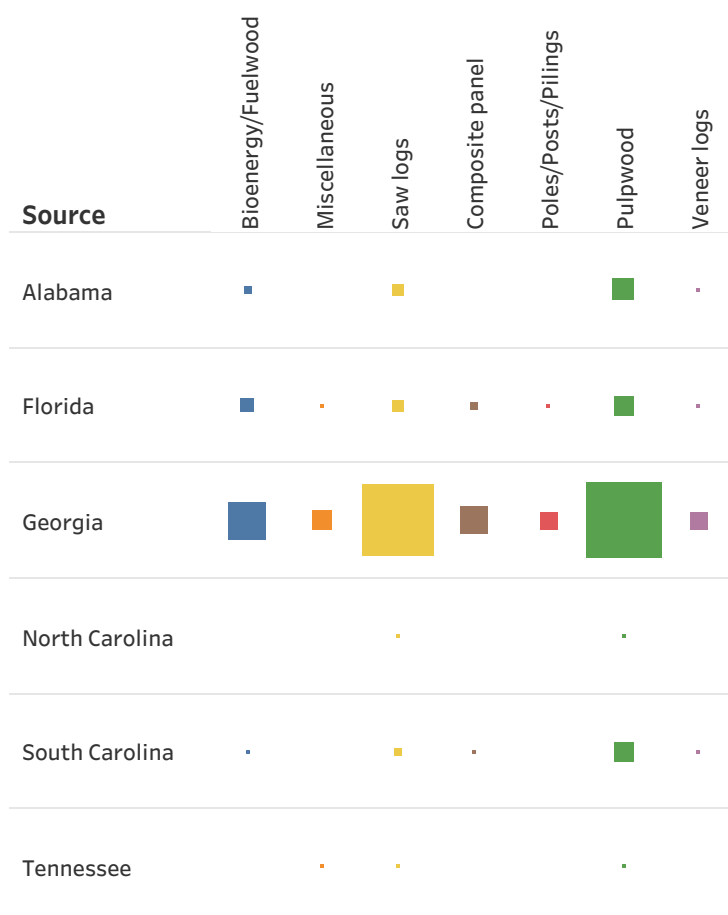

Georgia retained 1,204,620 MCF and imported 188,254 MCF from other States for total receipts of 1,392,874 MCF.

Receipts (Retained and Imported Wood)

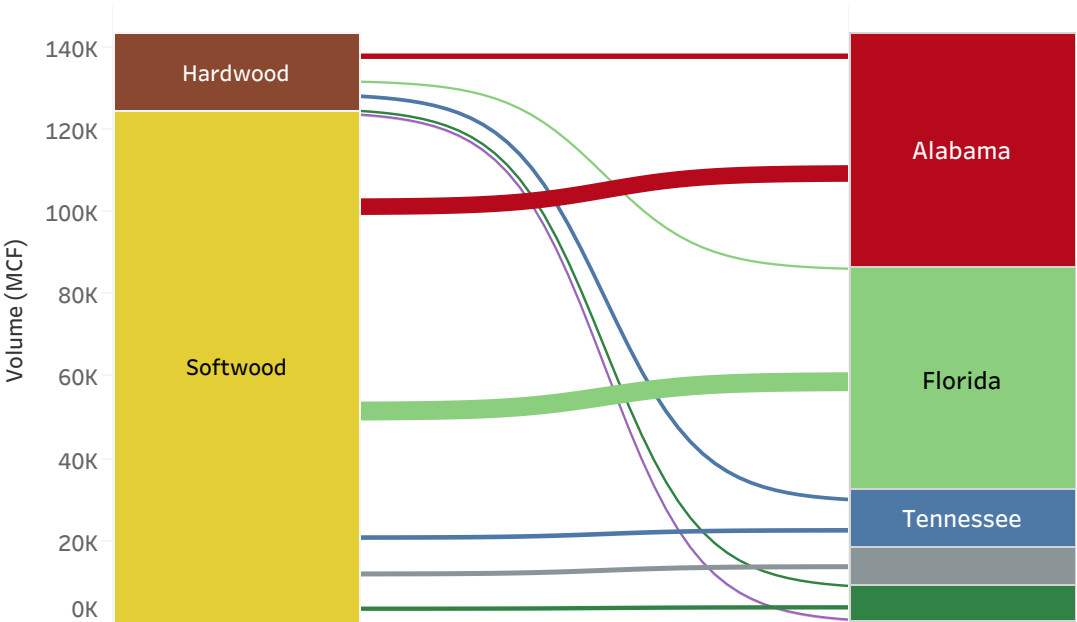

In 2021, Georgia was a Net Importer

Imports

Exports

Roundwood exports include volume transported to other U.S. States or other non-U.S. regions with Georgia transporting 143,304 MCF in total exports for 2021. Softwood exports accounted for 86.77 percent, with hardwood being 13.23 percent of the total.

Timber Product Output

The National Timber Product Output (TPO) section of the Forest Inventory and Analysis (FIA) program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.usda.gov/program-features/tpo/>
