Forests of West Virginia, 2021

78% forested*

West Virginia has an estimated **12,025,205** acres of forest land.

* Percent forest is forest area/total area. Percent forest with water removed from total area is 78%.

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in West Virginia. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

West Virginia has 2,346 sample plots across the State, of which 2,015 are currently forested. Each year, about 10-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 06/23/2023.

18,725 acres of nonforest revert back to forest annually*

30,014 acres of forest land convert annually* to nonforest

105,576 acres of forest land are treated by cutting (harvest, thinning, etc.) annually*

5,052 acres of forest land are disturbed annually* by fire

22,262 acres of forest land are disturbed annually* by weather events

USDA Forest Service - Forest Inventory & Analysis

The estimates presented are based on data retrieved from the FIA database (06/23/2023) and may not reflect the most recent data available from the FIA program. Note – this publication does not include estimates of uncertainty. The most current data and sampling error for the estimates above can be found by visiting <https://www.fs.usda.gov/research/programs/fia>.

*Average annual estimates are based on data collected across 5-10 years and may not be indicative of the nominal year presented in the title by itself.
