

Timber Product Output and Use for Arkansas, 2023

There were about 93 primary wood processing mills in Arkansas

Arkansas had a total roundwood production of 637,436 MCF

Arkansas generated 4,455,178 dry tons of mill residues

Archived Versions

This report can be found in the USDA Forest Service publication database (Treesearch at: <https://research.fs.usda.gov/treesearch>). Archived versions of Resource Updates can be found by searching Treesearch by using keywords "Forest Inventory", "Timber products", and "Arkansas".

National Resource Use Monitoring

Timber Product Output (TPO) is a component of FIA's National Resource Use Monitoring (NRUM) program aimed at gathering and reporting information on industrial and nonindustrial uses of roundwood. Data are gathered through annual surveys of primary wood processing facilities and aggregated and reported at the county and/or state level. Data and more information about NRUM and TPO can be found here: <https://research.fs.usda.gov/programs/nrum>

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis NRUM database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.

The FIA TPO one-click application can be found here: <https://public.tableau.com/views/FIATPOOneClickFactsheet/StateSelection?:showVizHome=no>.
