

Timber Product Output and Use for: West Virginia, 2019

West Virginia forests accounted for a total of 132,782 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 110,914 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in West Virginia. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Composite Panel/Engineered
- + Log home mill (include Viga and Latilla mills)
- ◇ Misc - Concentration/export yard
- × Miscellaneous mill
- ▷ Post mill
- △ Saw mill (includes cooperage/stave, handle mills)
- * Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

West Virginia had a total production of 132,782 MCF in 2019.

There were about 66 primary wood processing mills in the State.

Statewide roundwood production (% of total) by product

Miscellaneous* 53.0%
Saw logs 47.0%

*Misc. includes all roundwood uses not listed

Total roundwood production

■ Hardwood ■ Softwood

West Virginia imported 19,914 MCF into the State and exported 41,783 MCF out of the State making them a net exporter of roundwood.

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://research.fs.usda.gov/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis TPO database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.
