

Timber Product Output and Use for Rhode Island, 2020

There were about 4 primary wood processing mills in Rhode Island

Rhode Island had a total roundwood production of 459.5 MCF

Rhode Island generated 3,390 dry tons of mill residues

2020 Roundwood Production, Exports, Retained, Imports, and Receipts

National Resource Use Monitoring

Timber Product Output (TPO) is a component of FIA's National Resource Use Monitoring (NRUM) program aimed at gathering and reporting information on industrial and nonindustrial uses of roundwood. Data are gathered through annual surveys of primary wood processing facilities and aggregated and reported at the county and/or state level. Data and more information about NRUM and TPO can be found here: <https://www.fs.usda.gov/research/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis NRUM database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.

The FIA TPO one-click application can be found here: <https://public.tableau.com/views/FIATPOOneClickFactsheet/StateSelection?:showVizHome=no>.
