

Timber Product Output and Use for New Jersey, 2021

There were about 13 primary wood processing mills in New Jersey

New Jersey had a total roundwood production of 1,829 MCF

New Jersey generated 9,688 dry tons of mill residues

2021 Roundwood Production, Exports, Retained, Imports, and Receipts

Mill Type

- △ Export yard
- + Log home mill (include Viga and Latilla mills)
- △ Post mill
- X Saw mill

Species Processed at Mill

- Hardwood
- Hardwood/Softwood
- Softwood

National Resource Use Monitoring

Timber Product Output (TPO) is a component of FIA's National Resource Use Monitoring (NRUM) program aimed at gathering and reporting information on industrial and nonindustrial uses of round wood. Data are gathered through annual surveys of primary wood processing facilities and aggregated and reported at the county and/or state level. Data and more information about NRUM and TPO can be found here: <https://research.fs.usda.gov/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis NRUM database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.

The FIA TPO one-click application can be found here:
