U.S. DEPARTMENT OF AGRICULTURE

Spring 2024 Schedule

Rocky Mountain Research Station Presents

Science You Can Use WEBINARS

Registration is required

Feb 14	Wildfire and resilient landscapes: New tools for detailed analyses	<u>John Hogland</u>
Feb 21	Streams, springs, and fens! Assessing riparian and groundwater-dependent ecosystems for forest plan revision	<u>Katey Driscoll & Max Smith</u>
Feb 28	Pinyon-juniper treatments optimized: With considerations for sagebrush conservation, pinyon jays, and songbirds	<u>Jason Reinhardt</u>
Mar 6	Biochar production, benefits, and barriers in forested lands	<u>Derek Pierson</u>
Mar 13	Prescribed fire and wilderness: Barriers and opportunities in a time of change	<u>Sean Parks</u>
Mar 20	The effects of timber harvest on grizzly bear habitat use and diet	<u>Tavis Forrester & Dan Tyers</u>
Mar 27	TreeMap is a tree-level model of U.S. forests - New data delivery and visualization improvements make it easier to use	<u>Karin Riley & GTAC</u>

Join RMRS scientists for these land management-focused webinars.

Each day will be half presentation, half Q&A.

Click the scientist's name to learn more about their work.

[View past webinars on our website.](#)

All webinars will take place from 10:00 - 11:00 MT.

SAF credit will be available.
