

Selecting the right tree

Nurseries are an excellent source of trees to plant because they offer a variety of trees in different growing sources. Nurseries have trees planted in pots, trees grown in containers on the ground, bare root trees & balled trees. Please make sure you did a site evaluation before purchasing your trees so you have all information needed to make a good selection.

Most of the trees in a nursery are grown in pots. Trees grown this way have the advantage of keeping all their roots and can also be planted in the desired place at any time of the year. Some nurseries produce sack or balled trees. These trees usually are larger. Please be aware that, in the process of bowling the tree it can lose up to 95% of its roots.

Keep this options in mind when choosing the right tree to plant.
