

Timber Product Output and Use for Vermont, 2021

There were about 59 primary wood processing mills in Vermont

Vermont had a total roundwood production of 31,865 MCF

Vermont generated 166,856 dry tons of mill residues

Mill Type

- Biomass/energy
- × Saw mill
- * Veneer

Species Processed at Mill

- Hardwood
- Hardwood/Softwood
- Softwood

2021 Roundwood Production, Exports, Retained, Imports, and Receipts

Total Roundwood Production by Species Over Time

2021 Roundwood Production (% of total) by Species and Roundwood Product

Hardwood Production by Roundwood Product

- Roundwood Product
- Miscellaneous
 - Saw logs

Softwood Production by Roundwood Product

- Roundwood Product
- Miscellaneous
 - Saw logs

2021 Top 10 Species by Roundwood Production Volume

Top 10 Species

- White pine
- Hard maple
- Soft maple
- Ash
- Yellow birch
- Spruce
- Hemlock
- True firs
- Other birch
- Beech

National Resource Use Monitoring

Timber Product Output (TPO) is a component of FIA's National Resource Use Monitoring (NRUM) program aimed at gathering and reporting information on industrial and nonindustrial uses of round wood. Data are gathered through annual surveys of primary wood processing facilities and aggregated and reported at the county and/or state level. Data and more information about NRUM and TPO can be found here: <https://research.fs.usda.gov/programs/nrum>.

Additional Resources

The application that produced this resource update was developed using data from the USDA Forest Service Forest Inventory and Analysis NRUM database: <https://public.tableau.com/views/TPOREPORTINGTOOL/MakeSelection?:showVizHome=no>. Factsheet estimates may not match table estimates due to data refinements after factsheet publication.

The FIA TPO one-click application can be found here:
